This consists of the unique worldwide patented **Automatic Lifting System (A.L.S.)**. It's hidden self lifting system provides effortless opening and closing of the umbrella.

To open the umbrella, one simply lifts the umbrella's arms until the **A.L.S** takes over, lifting the umbrella until it is fully open. No holding pin is required as the hub locks into place automatically.

To close the umbrella, one simply pulls down on the hub until the **A.L.S.** takes over and closes the umbrella.
