OPENING

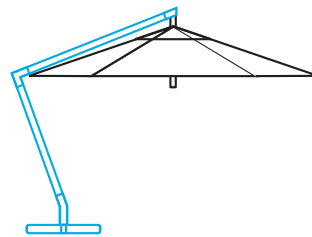

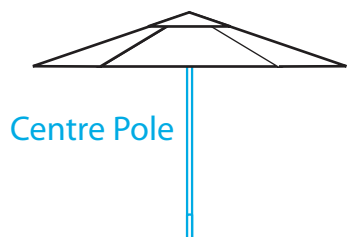

Pulley System
double pulley and rope

Automatic Lifting System
A.L.S allows effortless opening & closing

Automatic Lifting System
A.L.S allows effortless opening & closing

Automatic Lifting System
A.L.S allows effortless opening & closing

MOUNT

*all wooden option also available.

This consists of the unique worldwide patented **Automatic Lifting System (A.L.S.)**. It's hidden self lifting system provides effortless opening and closing of the umbrella.

To open the umbrella, one simply lifts the umbrella's arms until the **A.L.S** takes over, lifting the umbrella until it is fully open. No holding pin is required as the hub locks into place automatically.
To close the umbrella, one simply pulls down on the hub until the **A.L.S.** takes over and closes the umbrella.

Virtually indestructible die-Cast **Aluminium Hubs** with a 2 year warranty. Powder coated to match wood or aluminium or polished to match stainless steel.

With the use of **Stainless Steel Elements**, from the male-female interlocking bolt system to stainless steel poles, our products really stand apart from the competition.
